

**Virtual Security, Privacy,
Compliance Officer Service**

Expertise you can trust

Many organizations don't need full time experts on staff.

The Business Challenge

The role of the Security and Privacy Officer continues to grow in importance. For many organizations, the challenge is to find a qualified credentialed resource with healthcare experience, in-depth knowledge of healthcare regulatory requirements, and industry frameworks.

Having first-hand knowledge of healthcare operations, and state and federal regulations, is critical to reprioritizing day to day job duties when there is a complaint or potential breach that compromises the security or privacy of protected health information. Your security/privacy/compliance officer's expertise and prior experience specific to investigation, triage, and documentation, to complying with the Breach Notification Rule is compounded with applying the appropriate incident response plan to mitigate risk.

According to Ponemon Institute/IBM Security's 2020 Cost of Data Breach Study: Global Overview, the average cost of a healthcare data breach increased 10% compared to the 2019 study. Unsurprisingly, skills shortage was among the top three factors that increased the average cost of a data breach.

Today, the privacy officer needs to understand security safeguards. This is more important than ever due to the continual rise in cybersecurity threats, smart technology, and social media and the rise in ransomware events, a threat to patient care.

As healthcare moves to a patient-centric consumer model, plan for an increase in privacy concerns and complaints. The number one complaint the Office for Civil Rights (OCR) receives from patients is about providers not giving them access to his/her medical records. In February 2021, HHS OCR Issued its 15th HIPAA records access settlement.

The tw-Security Solution

Many organizations don't need full time experts on staff.

Customized to accommodate diverse organizations, our right-sized flexible Virtual Officer (VSPO) offering is disciplined support aimed at developing, maintaining, or advancing your security, privacy, and compliance programs.

tw-Security credentialed security and privacy professionals are experienced in managing programs to preserve the overall confidentiality of protected health information (PHI) and Personally identifiable information (PII) to be in compliance with federal and state laws.

Consider tw-Security as a set of "fresh eyes" and an extension of your workforce. We quickly assess your current capabilities, resources, and evaluate your processes, policies, and operational practices. The results inform the development of a prioritized plan to provide hands-on strategic and tactical support. The workplan addresses risk and compliance remediation tasks and a status of accomplishments.

Our cohesive proprietary methodologies, tools and templates focused on efficiency and measurable results that are updated to keep pace with cybersecurity threats and newly discovered vulnerabilities. This service documents ongoing risk management efforts and enhances your compliance 'Book of Evidence.'

tw-Security aligns our project management practices and standards with the principles and methodologies of the Project Management Institute (PMI).

All organizations don't need or may not be able to justify the expense of hiring a fulltime, healthcare experienced, credentialed security/privacy/compliance professional.

Virtual Security, Privacy, Compliance Officer

A tailored cost-effective solution designed to provide:

- J **Guidance and prioritize tasks** - We provide guidance to keep your security and data privacy programs moving forward. Our methodology assures that your limited resources are being applied to manage risk to an acceptable level and address compliance issues.
- J **Expertise when needed** - Our credentialed experts provide program leadership continuity. We provide help as needed through emails or scheduled calls.
- J **Accountability to executive management** - We communicate programs and project status to key stakeholders and assist in removing project barriers.
- J **Efficient and effective proprietary tools** - We have developed policies, procedures, and plans to align with multiple industry and regulatory requirements. We tailor and test our tools to effectively and efficiently deliver results.
- J **Knowledge transfer** - We provide knowledge to stay abreast of changes that impact your security and privacy program and mentor staff as needed.

Our services include:

- J Virtual or Interim Security/Privacy/Compliance Officer
- J Strategy and planning
- J Compliance – multiple regulations, standards, and frameworks, audit preparation
